Software System

Production Tracking Software System

IDM's Production Tracking Software System (PTSS) is a feature rich production planning and ERP solution that gives today's manufacturers the timely information needed to meet customer requirements. Raw Materials Purchasing, Production Scheduling to finished Goods packaging, PTSS makes setting up and tracking your production easy to manage and maintain by providing user friendly capabilities in a robust 32 bit operating environment that offers stability and flexibility to grow your business. PTSS will make your production scheduling and inventory management tasks flow smoothly.

Features:

- ◆ Customer/Vendor Maintenance
- ◆ Raw and Finished Goods Maintenance
- ◆ Kitting
- ◆ Multiple Component kits to One Finished Good
- ◆ Pallet Tracking
- ◆ Lot/Serial # Tracking
- ◆ Purchasing
- ◆ Sales Order Entry
- ◆ Sales Order Quoting
- ◆ Sales to Work Order Scheduling
- ◆ Production Scheduling
- ◆ Production Line Scheduling
- ◆ Production Line Work Order Entry
- ◆ Batch & RF Data Collection Modules
- ◆ Inventory Re-Order and Max Quantity
- ◆ Barcode Printing
- ◆ Production Priority
- ◆ Exception reports from the data download screens
- ◆ General Reports

Customer Defined Tables:

- ◆ Multiple Warehouses
- ◆ Production Classification
- ◆ Product Sub- Classifications
- ◆ Production Line Table with Shift Specification.
 - ◆ Manufacturer Table

Portable Terminal Applications:

Portable Data Terminals can be used with our batch or Radio Frequency Module. PTSS comes with the batch module which includes 4 applications.

- ◇ Receiving Application
- ◇ Shipping Application
- ◇ Movement
- ◇ Physical Inventory

The data collected will be interfaced with the main PTSS software for system updating and error reporting and correction.

Additional Options and Features:

Purchase Order - Attach Log comments and Notes for others to view.

Production Processing Entry screen - Allows entry of finished goods processing, increment finished goods inventory, print pallet label at the production line.

Bar Code Printing of Serial #/Case Pack Number, Finished pallet ID Labels, Incoming Raw Material Pallet Labeling

Security:

PTSS provides for login security and control of user accessibility to the software and its functions.

System includes the PTSS software package, 4 Portable Data Terminal applications, bar coding printing capability. PC requirements are Windows 7 or Higher versions.
